

Series CT Day Spa Steambath Sizing & Selection

To select a suitable CT Day Spa Generator Model:

Materials of construction, room size (including room height) and special design features such as large glass areas, all affect the steam generator model selection.

| | |
|--|----------------------------|
| 1 Measure length, width & height in feet of the steam/shower or tub/shower: | |
| Multiply the Length _____ x Width _____ x Height _____ = | ROOM VOLUME |
| 2 Adjustments to Room Volume: | |
| For natural stones: natural marble, stone, shale, glass block or concrete | Add 100% |
| For ceramic or porcelain tile on cement board or mortar bed | Add 30% |
| For each exterior wall or extra glass panel | Add 15% each wall or panel |
| For each foot exceeding 8ft. in height | Add 15% each foot |
| 3 Add all figures above to obtain the Total Room Volume required | TOTAL ADJUSTED ROOM VOLUME |

IMPORTANT: The guidelines for selecting the steambath generator is a recommendation only. Because of variables in construction, these sizing instructions and specifications should be considered as guidelines only. Mr.Steam will review the model selected provided we receive complete information, including working drawings, specifications, and pertinent electrical and construction details. Otherwise the manufacturer disclaims responsibility for the sizing of a model selected.

IMPORTANT: Choose a Mr.Steam® CT Day Spa Steam System if... the steam room will be in operation less than 6 hours, the steam room is designed to accommodate up to two persons, or the steam room is less than 575 cu.ft. in volume.

IMPORTANT: For steam rooms constructed of acrylic or synthetic materials select next lower-rated CT model.

WARNING: For instructions on installing, operating & maintaining the steam generator unit, refer to the Mr.Steam® CT Day Spa Installation, Operation & Maintenance Manual.

WARNING: Not for multiple steam room applications.

Visit www.mrsteam.com to download CT IOM (PN 100426) or call East coast 1-800-76 STEAM or West Coast 1-800-72 STEAM for a copy.

Compare your TOTAL ADJUSTED ROOM VOLUME to the Specification Chart below and select the appropriate model.

CT Day Spa Steam Generators Specification Chart

|  | Model/ Item No. | KW | Amps (for 240v/1PH)† | Wire Size‡ | TOTAL ADJ. ROOM VOL. | Water Usage gallons†† | Dimensions* | Shipping Wt.(lbs)** | List Price |
|--|--------------------|----|-------------------------|---------------|-------------------------|--------------------------|---------------------|------------------------|---------------|
| | CT6E | 6 | 25 | 10 | 150 | 0.80 | 16"L x 18½"H x 7⅞"D | 60 | \$2725.00 |
| | CT9E | 9 | 42 | 8 | 360 | 1.2 | 16"L x 18½"H x 7⅞"D | 60 | 2995.00 |
| | CT12E | 12 | 50 | 6 | 575 | 1.6 | 16"L x 18½"H x 7⅞"D | 60 | 3245.00 |

IMPORTANT: Add C1 suffix to model no. for 240V/1PH; Add B1 suffix to model no. for 208V/1PH.

IMPORTANT: All Models must use eTEMPO/Plus and eTempo/Start controls.

IMPORTANT: All Mr.Steam CT units are cUL Listed and CE & NOM approved.

*Dimensions are for generator only, with standard AutoFlush® plumbing features.

**Shipping weight and pricing are for generator only, without control or steamhead.

Notes: All CT Generators available in 240v/1PH, 208v/1PH and other voltages/phases.

†† Water usage based on 20 minutes steambathing session.

† Amps are for 240/1PH rated units. ‡ Wire size (AWG) based on minimum 90°C rated insulation for copper conductors. See pages 15 for controls and accessories. See Mr. Steam® Installation and Operation Manual for dimensional and installation information. Refer to PUR 100426.
